```

Flowchart illustrating the system architecture and data flow:

- Registered User 404** interacts with **Internal Operational Access 400** (For Additional detail, see Figure 1).
- Registered User 404** connects to **Creates Song/Album Database 402** via the **Internet**.
- Creates Song/Album Database 402** connects to **Accesses Stored Files and Corresponding Databases Site 100 406**.
- Accesses Stored Files and Corresponding Databases Site 100 406** provides **Communication** to **Registered User 404**.
- Accesses Stored Files and Corresponding Databases Site 100 406** leads to **Communication established, interacts with databases of songs/albums, completes surveys. Information compiled in Information DB.**
- User Makes Database Request 408** is generated from the communication.
- User Makes Database Request 408** leads to **Provides Preference Information 410**.
- Provides Preference Information 410** leads to **Information DB Updated 412**.
- Information DB Updated 412** leads to **Reporting Database which contains Preference Information Provided by Registered Members 418**.
- Reporting Database which contains Preference Information Provided by Registered Members 418** is associated with **Song Information Database 418**.
- Reporting Database which contains Preference Information Provided by Registered Members 418** leads to **Retrieval of Query Information 422**.
- Retrieval of Query Information 422** leads to **Refine Query 424**.
- Refine Query 424** leads to **Selects Query Parameters 420**.
- Selects Query Parameters 420** leads to **Accesses Database 416**.
- Accesses Database 416** connects to **Registered User 404** via the **Internet**.
- Accesses Database 416** connects to **Creates Song/Album Database 402**.
- Accesses Database 416** connects to **Accesses Stored Files and Corresponding Databases Site 100 406**.
- Accesses Database 416** connects to **Information DB Updated 412**.
- Accesses Database 416** connects to **Reporting Database which contains Preference Information Provided by Registered Members 418**.
- Accesses Database 416** connects to **Retrieval of Query Information 422**.
- Accesses Database 416** connects to **Refine Query 424**.
- Accesses Database 416** connects to **Selects Query Parameters 420**.
- Accesses Database 416** connects to **Client 414**.
- Client 414** provides **For Additional Detail See Fig. 2.** to **Internal Operational Access 400**.
- Client 414** provides **For Additional detail, see Figure 3** to **Internal Operational Access 400**.
